## BACKGROUND

**SOUTHERN BASIN LIMITED** is an indigenous Engineering, Construction, Project Management, Logistics and Procurement Company with 100% stock of Nigerian shareholding.

The firm was incorporated in Nigeria since 2011 as **SOUTHERN BASIN LIMITED** with registration number RC 999968.

**SOUTHERN BASIN** provides specialized solution to Engineering Construction needs in the Civil, Mechanical and Logistics sectors of the Oil & Gas, Energy and Public industries of today. This specialty, we demonstrate in road construction, building and infrastructural development, oil & gas facility upgrade, pipeline engineering / construction to Private and Public organizations in the Oil and Gas Industry and other major contractors.

Our Equipment are 40% minimum owned while minimum of 15%, we have deliberately left to fulfil part of our local content policy directives and 45% in lease and understanding with partner equipment owners.

The firm is relatively young in business; its incorporation is a product of immeasurable practical experience possessed by its directors in the fields of engineering construction, project management and logistics over a period of 12 years pre-incorporation, managing and supervising major construction projects with other employers. No wonder it gained award of not less than 3 projects as subcontract almost immediately after registration as a company with the Nigerian CAC. This success is a rub off from the professional experiential goodwill possessed by its ownership.

Our Recruitment Policy is to engage and maintain professional management personnel and technical tradesmen and labours, with vast experience in their various areas of specialties while respecting the Local Content Policy of Nigeria in all ramifications.

Our Technical Partnership and collaborations with local and foreign companies are planned to synergize companies with **SOUTHERN BASIN LIMITED** to offer a turn-key approach to its project execution by offering advanced construction and logistic services to our esteemed clients. We believe in and respect the law of comparative advantage in our partnership business religiously as a tool for successful time management and fulfilment of our globalization policy.

Project Execution only commence after due and rigorous articulated planning with client's vision/objectives is well understood coupled with environmental considerable and community concerns. Projects are planned with timelines for every step visibly outlined in schedules such as cash outflows, material utility, personnel logistics, equipment logistics, weather characteristics as well as infrastructural need of the immediate society and client's. We believe that these are the practical ingredients of a successful Project Implementation Plan (PIP) that eventually translates every project to completion status.

Concerning Safety Matters, we are aware of the implication of operating in the construction industry. Therefore, we have developed published Health, Safety and Environment Policies and guidelines which responsibility starts from the Managing Director, to who the HSE Manager is responsible. Good Safety practice on the job therefore is non-negotiable and inevitable.

**SOUTHERN BASIN** ongoing operating standards requests/practicing certifications includes:

ISO 9001 Quality Management System  
ISO 14001  
ISO 45001  
OHSAS 18001 Quality Safety Management
